BEYOND DISCLOSURE

This programme provides insights, feedback and practical support to help companies improve their reporting practices, in line with the TCFD recommendations and regulatory requirements.

With the release of the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and the transposition into law of the EU Non-Financial Reporting Directive, a growing number of investors and stakeholders are demanding better-quality reporting of climate change information. Companies are now being asked to disclose in their mainstream reports what the risks and opportunities of moving to a low-carbon economy are. CDSB is uniquely placed to support these organisations, having been a leader in the development of mainstream reporting frameworks over the last decade and being the most heavily referenced framework in the TCFD recommendations.

Beyond Disclosure provides companies with the support they need to meet the TCFD recommendations and feedback on compliance with relevant regulatory requirements. It helps them deliver consistent and meaningful environmental and climate change information in their mainstream reports by reviewing their reporting approach against the CDSB Framework, while encouraging and recognising best practice in reporting.

What can your company achieve?

- Receive a comprehensive review of your current mainstream reporting approach against best practice and requirements from the CDSB Framework and TCFD recommendations;
- Be better positioned to provide clear and material information on your climate and environmental performance to your investors and stakeholders;
- Be better equipped for regulatory compliance, as new policies or voluntary guidelines for environmental and climate disclosure develop;
- Receive practical support on how to use the CDSB Framework to comply with regulatory requirements and investor and stakeholder requests;
- Gain insights into the latest developments in global climate reporting practices.

How does it work?

We will help your company develop better reporting practices that are useful for investors and are compliant with mainstream reporting requirements, keeping you at the forefront of the global corporate reporting activity.

Review

CDSB will review your company's current reporting strategy and reports, in the context of sustainability reports, annual reports and CDP responses to identify gaps, differences, KPIs and reporting architectures.

Engagement

Our team will interview key stakeholders to discuss reporting strategy, reporting processes, internal controls, management approach, systems and overall coherence of reporting.

Report

Our team will provide written feedback on the outputs of the first two phases, including analysis of leading practice, and practical next steps to fully integrate the results of the programme into your company's reporting using the CDSB Framework.

Support

Your company will have access to our team of reporting experts throughout your reporting period. Additional tailored services are available to help your company explore specific issues regarding climate reporting.
